✓ 1) Which one of the following is not a muscle of mastication? \*

4 / 4

- a) Masseter
- b) Temporalis
- c) Pterigoid
- d) Orbicularis oculi

Add individual feedback

✓ 2) Bones forming cranium include all except \*

4 / 4

- a) Temporal
- b) Parietal
- c) Zygomatic
- d) Occipital

Add individual feedback

✓ 3) Which one of the following is not a flat bone? \*

4 / 4

- a) Carpals
- b) Ribs
- c) Sternum
- d) Skull

Add individual feedback

✓ 4) Paranasal sinuses include all except \*

4 / 4

- a) Frontal
- b) Sphenoid
- c) Mastoid
- d) Ethmoid

Add individual feedback

✓ 5) Which one of the following bones is not in the cranium? \*

4 / 4

- a) Parietal
- b) Temporal
- c) Superior conchae
- d) Inferior conchae

Add individual feedback

✓ 6) Which part of radius is on the distal end of radius? \*

4 / 4

- a) Styloid process
- b) Interosseus membrane
- c) Olecranon process
- d) Trochlear notch

Add individual feedback

✓ 7) Which one is true about lumbar vertebral \*

4 / 4

- a) They are smaller than thoracic
- b) The distal body forms the lumbo-sacral joint
- c) They are square shaped
- d) They have bifid spinous process

Add individual feedback

✓ 8) The following muscle connects the upper limb with the thoracic wall: \*

4 / 4

- (a) Pectoralis major
- (b) Biceps brachii
- (c) Extensor carpi ulnaris
- (d) Pronator teres

Add individual feedback

✓ 9) Which of the following is contained in the middle ear? \*

0 / 0

- (a) Pinna
- (b) External auditory meatus
- (c) Auditory ossicles
- (d) Semicircular canals

Add individual feedback

✓ 10) The liver is located in the ..... and extends....., into the.....Region of the body \*

4 / 4

- a) Left upper quadrant, along the midline, right upper quadrant
- b) Right lower quadrant, across midline, left upper quadrant
- c) Right upper quadrant, across the midline, left upper quadrant
- d) Left lower quadrant, to left upper quadrant

TRUE AND FALSE

55 of 64 points

BE KEEN ENOUGH, ONE wrong, ALL wrong

✗ 1. Proximal row of carpal bones include \*

0 / 5

- a) Scaphoid
- b) Hamate
- c) Trapezoid
- d) Pisiform
- e) Triquetrum

Correct answer

- a) Scaphoid
- c) Trapezoid
- d) Pisiform

Add individual feedback

✓ 2. About the lungs and bronchi \*

5 / 5

- a) The right lung has 3 lobes ✓
- b) The left lung has 2 lobes ✓
- c) The hilum of the lungs gives a channel of blood vessels ✓
- d) The left bronchus is shorter and straighter than the right
- e) The right bronchus is shorter and straighter than the left ✓

Add individual feedback

✓ 3. Components of the upper respiratory tract include \*

5 / 5

- a) Larynx ✓
- b) Nasopharynx ✓
- c) Trachea
- d) Bronchi
- e) Nose ✓

Add individual feedback

✓ 4. The following are paired facial bones \*

5 / 5

- a) Maxilla
- b) Sphenoid
- c) Zygomatic
- d) Ethmoid
- e) Mandible

Add individual feedback

✓ 5. Human ribs: \*

5 / 5

- a) Are 6 pairs
- b) 1st rib is horizontal
- c) Enclose the lungs
- d) Do not articulate with thoracic vertebral
- e) All ribs articulate with the sternum

Add individual feedback

✓ 6. Regarding the distal humerus: \*

5 / 5

- a) The capitulum is medial condyle
- b) The trochlear marks the medial condyle
- c) Has olecranon fossa
- d) Has a trochlear notch
- e) Has two epicondyles

Add individual feedback

✓ 7. Respond to the following information pertaining to blood supply to the GIT \*

5 / 5

- a) The liver and the stomach are supplied by branches of celiac trunk
- b) Ascending and transverse colon are supplied by branches of superior mesenteric artery
- c) Descending colon and rectum are supplied by branches of inferior mesenteric artery
- d) The stomach is supplied by the inferior mesenteric artery
- e) The duodenum is supplied by the renal artery

Add individual feedback

✓ 8. The following form the external female genitalia: \*

5 / 5

a) Mon's pubis

b) Clitoris

c) Vagina

d) Batholith's glands

e) Labia minora

Add individual feedback

✓ 9. The following form part of proximal end of humerus \*

5 / 5

a) Lesser trochanter

b) Greater tuberosity

c) Anatomical neck

d) Epicondyle

e) Linear aspera

Add individual feedback

✓ 10. About the pancreas: \*

5 / 5

- a) Is located behind the stomach ✓
- b) Has both endocrine and exocrine functions ✓
- c) Islets of Langerhans produce pancreatic juice
- d) Receives blood supply from coeliac and superior mesenteric arteries ✓
- e) Pancreatic duct drains enzymes into the jejunum

Add individual feedback

✓ The following are salivary gland, sublingual,mandibula,carotid \*

5 / 5

- true
- False ✓

Add individual feedback

✓ how many thoracic vertebra do a normal man has? \*

5 / 5

numbers only?

12 ✓
