**Total marks =100**

You are asked to review Mary, a 25-year-old para 1 +1 Gravida 3. Her last normal menstrual period was on December 06, 2015. She has been referred to your labour ward today, the 26.09.2016 for delivery.

1. Make a comprehensive diagnosis (4 marks)
2. What additional history would you obtain from Mary (28 marks)
3. Detail the relevant examination (s) you will perform on Mary (28 marks)
4. Justify the relevant investigations you will conduct (10 marks)
5. Justify the management plan (s) you will institute (10 marks)
6. Rationalize the potential complications Mary may experience regarding her comprehensive diagnosis, and where applicable outline how you will manage those complications (20 marks)
